

Library WiFi Certificate Procedure – Android Devices

1. Connect to public WiFi Network
2. Open your browser (Chrome is used here as an example) and go to <http://172.30.101.15/ssl/ca.der>
The **ca.der** certificate will be downloaded.

3. After the certificate is downloaded, click on it to install it. You will be asked to name the certificate. You can use any name that you would like, but `webtitan.douglasaz.gov` was used here for demonstrations purposes. Click **OK** and you should receive a notification at the bottom of your screen confirming that the certificate has been installed. Once the certificate has been installed, you are now ready to use the Library's WiFi network in its full capacity. Enjoy!
